Introduction

NSW public schools are committed to the pursuit of excellence and the provision of high quality educational opportunities for each and every child. This in turn facilitates the consistent improvement of student outcomes and the narrowing of achievement gaps between students.

Our aim is to maximise learning in our schools, including that students achieve at least a year’s worth of learning from every year’s teaching.

The School Excellence Framework supports all NSW public schools in their pursuit of excellence by providing a clear description of the key elements of high quality practice across the three domains of learning, teaching and leading.

The Framework describes 14 elements across these three domains which define the core business of excellent schools in three stages. Each year, schools will assess their practices against the Framework to inform their school plans and annual school reports. The description of excellence in the Framework supports schools as they engage their communities in the development of a shared vision, the identification of strategic priorities, and the ongoing tracking of progress towards them.

The focus is on students

All parents want the very best for their children. In education, this means teachers and schools with a commitment to nurture, guide, inspire and challenge students – to find the joy in learning, to build their skills and understanding, and to make sense of their world. In the early years, it means having confidence that each individual child will be known and understood, and their individual potential developed. As students progress, it means knowing that they are well supported as increasingly self-motivated learners – confident and creative individuals, with the personal resources for future success and wellbeing.

Excellence in teaching

Student learning is underpinned in excellent schools by high quality teaching and leadership. Teaching in these schools is distinguished by universally high levels of professionalism and commitment. Lessons and learning opportunities are engaging and teaching strategies are evidence-based. Individually and collaboratively, teachers evaluate the effectiveness of their teaching practices, including sophisticated analysis of student engagement, learning growth and outcomes, to plan for the ongoing learning of each student in their care. Teachers take shared responsibility for student improvement and contribute to a transparent learning culture, including through the observation of each other’s practices.

Excellence in leading

Strong, strategic and effective leadership is the cornerstone of school excellence. Excellent leaders have a commitment to fostering a school-wide culture of high expectations and a shared sense of responsibility for student engagement, learning, development and success. Students benefit from the school’s planned and proactive engagement with parents and the broader community. Leaders in excellent schools ensure that operational issues, such as resource allocation and accountability requirements, serve the overarching strategic vision of the school community. Ultimately, leaders in these schools enable a self-sustaining and self-improving community that will continue to support the highest levels of learning as a lasting legacy of their contributions.
In schools that excel, school culture demonstrates the building of educational aspiration and ongoing performance improvement across its community. Students take responsibility for their ongoing learning.

LEADING ELEMENTS:

SCHOOL PLANNING, IMPLEMENTATION AND REPORTING

- The school leadership team communicates clearly about school priorities and practices.
- Administrative practices effectively support school operations and the teaching and learning activity of the school.
- Accountability practices are tied to school development and include open reporting to the community.
- The school leadership team creates an organisational structure that enables management systems, structures and processes to work effectively and in line with legislative requirements and obligations.
- All school staff are supported to develop skills for the successful operation of administrative systems.

SCHOOL RESOURCES

- Practices and processes are responsive to school community feedback.
- Administrative practices provide explicit information about the school’s functioning to promote ongoing improvement.

MANAGEMENT PRACTICES AND PROCESSES

- There are opportunities for students and the community to provide constructive feedback on school practices and procedures.
- Streamlined, flexible processes exist to deliver services and information and strengthen parental engagement.

In schools that excel, management systems, structures and processes underpin ongoing school improvement and the professional effectiveness of all school members.
